EXPERIENCE - COGNIZANT TECHNOLOGY SOLUTIONS, PUNE

Associate | Nov 2024 - Present

Azure data engineering & automated operations

Build and maintain ADF ingestion workflows with reusable parameters, dependencies, and triggers. Investigate pipeline failures, validate data, and document operational procedures. Apply AI-assisted diagnostics and metadata-driven validation to recurring engineering tasks.

Programmer Analyst | Jun 2023 - Nov 2024

Data integration, transformations & quality

Developed and supported ETL/ELT workflows across SQL and Azure data environments. Worked with Databricks, PySpark, SQL, and ADLS Gen2 on transformation and verification. Collaborated on technical mappings, error handling, logging, and pipeline troubleshooting.

Programmer Analyst Trainee | Mar 2022 - Jun 2023

Enterprise operations analytics

Monitored operational workflows and recurring processing issues. Created spreadsheet and reporting automation for operational visibility. Maintained runbooks, configuration checklists, and handoff documentation.

SELECTED PROJECTS

AI Data Pipeline Support Assistant
An assistant that interprets ADF execution traces and turns technical errors into diagnostic guidance and incident communication.

Intelligent Data Quality & Reconciliation Framework
Reusable source-to-target checks that translate metadata into SQL validation, schema comparisons, and quality summaries.

Enterprise Operations Knowledge Assistant
A RAG proof of concept for finding workflow instructions and troubleshooting guidance inside SOPs and runbooks.
